From fine tuning swimming forms, bike setups, and running technique, teaching English in a foreign country and creating custom tools for performance tracking, my diverse background has built a quiver of skillsets to make me a well-rounded Developer.

Skills

- **HTML**
- **CSS**
- **JavaScript**
- **React**
- **NodeJS**
- **Git/GitHub**
- **Express**
- **MongoDB**
- **AWS**
- **Adaptability**
- **Communication**
- **Teamwork**

Projects

Shop Inventory

A pseudo discount shopping site that is only available to members. Utilizes account creation, login and Shopify like store, and shopping cart to total up the sales.

- Admin access with ability to add/edit/remove inventory and alter user accounts
- Express and Mongo DB to handle the backend
- Utilizes local storage, authentication and authorization via JWT
  Netlify: Shop Inventory GitHub: Shop Inventory

Events Scheduler

A CRUD app that is easy to use, easy to navigate and keeps you on top of your busy schedule. Sorts events into categories like today, this week, this month, all and past events. Ability to add alarm reminders for day of events.

- React JS frontend
- Express/MongoDB Atlas backend/database
- Moment JS to handle dates
  Heroku: Events Scheduler GitHub: Frontend   Backend

Learning Center

A React JS app backed by Express and Mongo DB that acts as my note keeping during my journey into web development.

- Flashcards with the ability to add, edit, or remove
- A catalog of various types of resources
- Will be a place to showcase my original content
  Heroku: Learning Center GitHub: Learning Center

Wedding Site

The website I created for my wedding that contained all the wedding information, a photo gallery of engagement photos and with the use of Google Forms, a place to RSVP. Besides being a resource for the wedding, this site challenged my creative/artistic side.

- Mostly HTML/CSS with a little bit of JavaScript
- CSS grid to display the gallery
  Heroku: Lefartins GitHub: Wedding Site

PROFESSIONAL EXPERIENCE

Fulfillment Supervisor

Backcountry.com, Salt Lake City, UT, 2016–2020

Joined as a part-time, seasonal merchandise processor that quickly changed to full-time vendor shipping problem solver, to quality control lead, and finally ending on a departmental supervisory position.

- Standardized workstations to improve efficiency
- Built a custom error and metric tracker that provided a more detailed and more accurate picture of individual performance
- Updated and/or created departmental SOPs for the integration of Netsuite's ERP software
- Increased the department's UPH by 3, surpassing the budget's expectations

High School Teacher

Columbia International College of Taiwan, Longtan, Taiwan 2015-2016

Taught grades 10 and 11 in English, Earth Sciences, and Social Sciences. As a charter school, we also prepped the students for independent living in a western country, where upon successfully completion of the IELTS exam, would continue grade 12 and college in Canada.

- Developed and adapted custom curriculums to meet the needs of varied levels of students.
- Established the school's first filmed club

Education

Bachelor of Science

Health Sciences - University of Central Florida, Orlando, FL

Certification

Certificate of Completion & Proficiency - Helio Training, Salt Lake City, UT
