I am an avid web developer with a diverse background that has built a professional foundation. Always looking to improve, whether it be a tool, a project, an environment or myself, I am currently seeking new opportunities for growth.

Projects

1927 Solvay Website   Completed: 09/2020

A retro-styled website, inspired by Steve Krug's book, Don't Make Me Think, to showcase the scientists from the 1927 Solvay Conference. This was a fun side project to apply concepts from the book while exploring image mapping and further practice with React, JavaScript and Material UI. Because of the image mapping, this is best viewed through a desktop display.

Netlify: 1927 Solvay **GitHub**: 1927 Solvay

Members Only Shopping Website   Completed: 06/2020

A pseudo discount shopping site built with a React front, Node and Express backend and Mongo as the database with full crud operations, that is only available to members. Utilizes account creation, login, a Shopify like store, administrative roles and privileges and a shopping cart to total up the sales.

Netlify: Shop Inventory **GitHub**: Shop Inventory

Events Scheduler App   Completed: 06/2020

A full CRUD application using a MERN stack and MomentJS that is easy to use, easy to navigate and keeps you on top of your busy schedule. Sorts events into categories like today, this week, this month, all and past events. Ability to add alarm reminders for day of events.

- **Heroku**: Events Scheduler   **GitHub**: Frontend   Backend

More Projects:

Wedding Site	**Completed: 08/2019**
Learning Center	**Completed: 08/2019**

PROFESSIONAL EXPERIENCE

Fulfillment Supervisor

Backcountry.com, Salt Lake City, UT   2016–2020

- Utilizing Google Sheets, JS like scripts and SQL, I reduced a 20-30 minute report down to 5-10 minutes while giving a much more accurate and in-depth view of employee performance.
- Updated and created departmental SOPs for the integration of Netsuite's ERP software

- Increased the department's UPH by 3, surpassing the budget's expectations
- Standardized and improved processors' workstations

High School Teacher
Columbia International College of Taiwan, Longtan, Taiwan   2015-2016
